"How does a university of science and technology achieve both profound **societal impact** and significant **discourse power**? Our answer was the establishment of the **Society Hub**. Strategically positioned within the academic structures of the university, the Function Hub and the Information Hub are intrinsically interconnected. This interconnectedness provides the essential foundation for the Systems Hub, and crucially, offers comprehensive support to the Society Hub."

## Dean's Message
院长寄语

We now live in an era defined by accelerating geopolitical tensions, economic uncertainties, and technological revolutions. Societies worldwide are confronting challenges of unprecedented scale and complexity. Yet, it is within these disruptions that extraordinary opportunities arise, driven by advances in AI, machine learning, and data-driven innovation.

Society Hub was founded with the mission to address these challenges. Guided by our vision to be a global leader in the age of intelligence, our values—Science for People, Technology for Good, Synergy for Innovation—anchor our commitment to combining scientific rigor, technological innovation, and deep social insight.

The past year marked a defining milestone in our academic development as all four Thrusts successfully launched their Research Postgraduate (RPg) Programs. We also strategically expanded our Taught Postgraduate (TPg) portfolio, introducing degrees such as the MSc in Carbon Neutrality and Green Finance and the MBA in Innovation and Entrepreneurship (MBA+), alongside our inaugural undergraduate major, the BSc in Financial Technology. Combined with our established MSc in Technology and Policy and the upcoming MSc in FinTech and Financial Engineering, Society Hub now offers a comprehensive educational ecosystem spanning undergraduate, master's, and doctoral levels.

Our growth, however, is measured not only in programs but in people. This year, our faculty and student populations expanded by one-third. With faculty hailing from six countries and new students representing five nations and 27 Chinese provinces, the Hub has truly become a global crossroads. This diversity—with a student body spanning from those in their early 20s to lifelong learners in their 40s—is our greatest strength, fostering an inclusive environment where innovation knows no bounds.

Looking ahead, our mission remains clear: to nurture leaders who do not just navigate change but shape it. Society Hub is a platform where innovation serves impact, technology empowers humanity, and education fuels meaningful contributions to the world.

Welcome to Society Hub—a community innovating for societal impact. Let's make a difference, together!
